REGIONALITY & SUSTAINABILITY

WE PRODUCE IN EUROPE

We are repeatedly asked what makes us so flexible. The answer is quite literally obvious. We produce our gloves in Austria and other European production facilities. 99% of the raw materials we use come from Europe and are meticulously tested in-house and by independent, accredited testing institutes.

The close proximity to our suppliers and our in-house sewing workshop are further guarantees of outstanding quality and flexibility. With this package and over 113 years of experience in our industry, we achieve long product life cycles and pursue consistent sustainability. Emergency services also benefit from this. It is not uncommon for our firefighting gloves to still be in use after 10 or 15 years. This is probably because we have always done what we know how to do. And we will continue to do just that.

EVERYTHING EXACTLY IN SIGHT

Quality must know no bounds! That's why we leave nothing, absolutely nothing, to chance. This starts with the careful pre-selection of materials. It is in the hands of our regularly trained employees and is the foundation for a glove that will give lasting pleasure. We pay close attention to where the material comes from and meticulously check its quality during acceptance and pre-sorting. To ensure that everything really fits, an additional check is carried out before allocation to production. And because we scrutinise everything so closely, the best conditions are in place for precise technical production. Our customers can rely on first-class wearing comfort and maximum tactility. That is our claim!

ESKA - Committed to tradition, dedicated to the future, committed to our customers.

CERTIFIED PRODUCTION.

Naturally at ESKA level.

ESKA has its own production facilities in Hungary and the Far East. The quality management system is certified according to ISO 9001.

AN AFFAIR OF THE HEART.

Firefighters like you usually save lives during firefighting operations. They are selfless, courageous and deserve the very best protection for their hands. High-quality, strictly tested European raw materials and our 113 years of expertise form the basis for the manufacture of our quality products. We focus on sustainability with long product life cycles. These quality principles correspond exactly in our DNA.

Managing director in 4th family generation,
Paul Herbert Loos

“

Protecting your hands is our top priority and is never left to chance.

- Paul Loos jun.

OUR HANDWRITING. SINCE 1912.

8041AP TITUS PRO

Coated para-aramid knit finger tip reinforcement

Knuckle protector protects against impact, shock and heat

Piping made of reflective materials for better visibility

Para-aramid knit with silicone coating on palm

Knitted cuff for superior tight fit on hand

8041AP TITUS PRO

The TITUS PRO glove is a non-leather textile fire fighting glove certified to AS/NZS 2161.6-2014 and fulfils the extremely strict standards tested and approved by an official Australian certification body. The new TITUS PRO fire glove comes in a completely new design and convinces with its 3D knuckle protector. The glove consists of several new highly technical fire resistant and thermally protected materials fully developed by ESKA.
